

K-LOVE radio serves me as a resident of my local community by being on the radio waves, by having a local representative to give prizes, make announcements for local activities that are good for the family.

The effect on the community if K-LOVE were not there would be devastating. I'm a strong believer of what you listen to is what your mind dwells on. People need positive things on their minds.

The service that K-LOVE provides is in the public interest because it makes people aware of events for families to participate.
